IV Course Description

GB600 Business Statistics 3 credit

Business Statistics is the science of collecting, organizing, and summarizing data to provide information, stated in numerical form, for the purpose of making objective business decisions. Descriptive statistics will be the focus of the course with an abbreviated introduction to inferential statistics. Topics include the foundations of statistical methods of sampling, classifying, analyzing, and presenting numerical data; frequency and sampling distributions, averages, dispersion, hypothesis testing, and analyzing up to two populations and population proportions. The course will employ the use of an online statistics learning

system for problem assignments, in conjunction with the text and lectures, in completing course coverage of each statistics topic.

GB601 Microeconomics 3 credit

The course examines how individuals and firms make decisions by weighing up costs and benefits, and how the interaction of their decisions leads to market and social outcomes. The model of market supply and demand is employed to examine the effects of taxes, subsidies, and other government interventions in market activity. The implications of different market structures, including perfect competition and monopoly, are examined. Public goods, externalities and common resources are key examples of cases in which private markets may yield socially sub-optimal outcomes. Such cases are examined and the role of government policy in correcting for these is discussed.

GB602 Macroeconomics 3 credit

Examine the overall behaviour of the economy. Whereas microeconomics focuses on individual decision makers (consumers, producers, workers, employers), macroeconomics deals with broad economic aggregates such as national income; the overall level of prices, employment, and unemployment; and the money supply. Topics covered include the meaning and measurement of gross national product, business cycles, the effects of government expenditure and taxation, causes of inflation and unemployment, and international trade and the balance of payments.

GB603 Accounting Theory 3 credit
