

Department of Economics

I Educational Goal

Economics is one of the key subjects in social sciences to explore the social structures on the basis of human economic activities. Today, every social aspect changes so rapidly that we need to have a new type of professional to meet the needs of our society. In line with this, we train students to equip themselves with a balanced education in economic theories and real economy.

II Educational Objective

We train students who will play a major role in a variety of fields such as education, industry, banking, international business, etc. To achieve objective, we try to establish the co-researching system between faculties and students, the customized counselling, the various award programs, the monitoring program between alumni and students.
